

010 Gaby Jung 300915

Dear Jay Weatherill,

I was one of the 80 people that walked from Port Augusta to Adelaide 3 years ago in support of Solar Thermal for Port Augusta.

Since then I have also been a member of CORENA (<http://corenafund.org.au/>) because I believe that putting Solar Thermal with storage into the renewable energy mix is essential on our way to reduce CO2 emissions drastically.

Please make solar thermal with storage in Port Augusta a priority for your climate strategy. This is also a great opportunity for the State Government to create new jobs in Port Augusta.

Regards

Gaby Jung
