RE Submission on South Australia's new Climate Change Strategy

Dear Climate Change Team

On behalf of the City of Salisbury, and the City of Playford, we provide the following feedback on the climate change consultation papers to help inform the development of a new Climate Change Strategy for South Australia.

This feedback does not represent a position of the Councils, rather it is an administrative response from teams across both Councils, contributing to the development of Adapting Northern Adelaide, our regional climate change adaptation plan. This submission is based on our experience in areas such as sustainable water management and building our cities to be more resilient to climate extremes. The submission also includes learnings to date from our current Adapting Northern Adelaide project and ideas we are exploring, which we would be interested in developing further with the State Government via the new Climate Strategy. A final Adapting Northern Adelaide Plan will be prepared by June 2016.

We would be welcome the opportunity to discuss opportunities for further low carbon and green industries growth, as we strengthen our capacity to adapt to climate change and economic change in the Northern Adelaide Region

Yours sincerely

Greg Pattinson
Manager Planning Policy
City of Playford

Terry Sutcliffe
General Manager City Development
City of Salisbury
