

Janet Fairlie-Cuninghame

Dear Premier,

As an 82 year old NSW resident I beg you to support further installations of solar-thermal power stations as Port Augusta has demonstrated by their project. We need a network of these power plants throughout Australia. This technology and other similar solar energy installations cannot come soon enough. Earlier this year I attended a presentation by Zero Emissions and was most impressed by the 24/7 capabilities and economies of solar –thermal to greatly assist our present and future energy needs in a clean and healthy manner.

Please accept this as my submission to your inquiry.
